

STELLARIS ELITE™

REIMAGINE ULTIMATE CONTROL.

Stellaris Elite
Vision Enhancement System

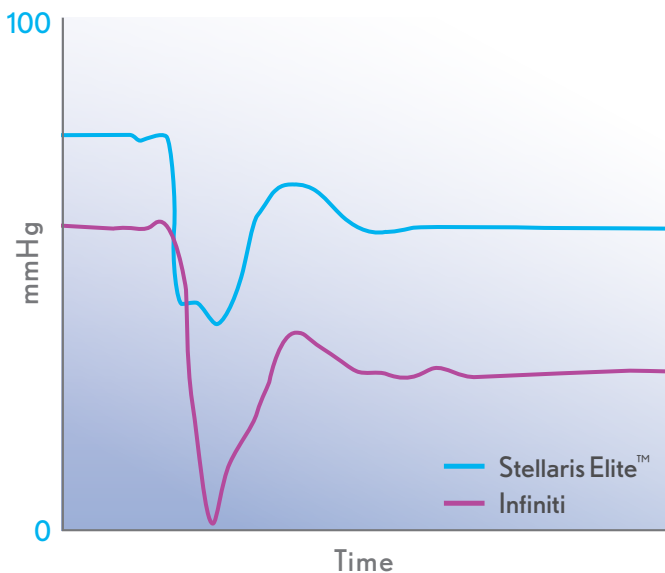

The Stellaris Elite™ system was redesigned with advanced features that automatically react to crucial procedural factors as they change, letting you focus on the surgery—not the system.

Stellaris Elite™ with Adaptive Fluidics

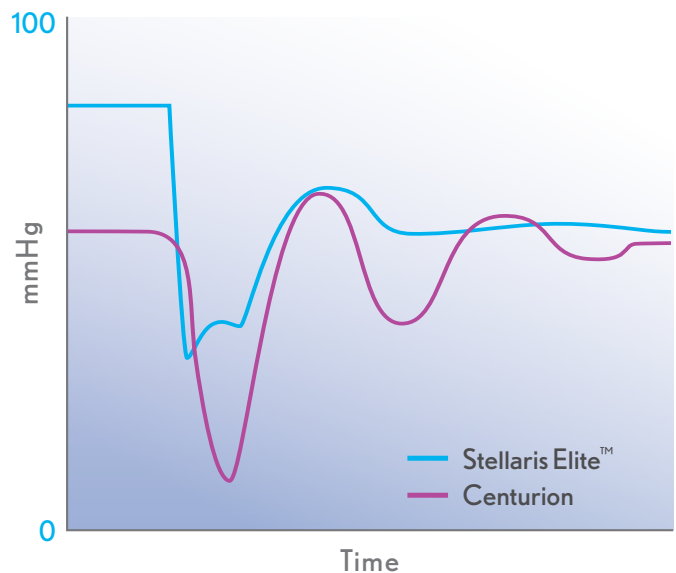

The newly-redesigned Stellaris Elite™ with Adaptive Fluidics™ integrates precision aspiration control with Dynamic Infusion Compensation to deliver a highly responsive and controlled surgical environment. In bench tests, Stellaris Elite™ demonstrated better chamber stability than both Infiniti and Centurion systems.^{1,2,3*}

[STELLARIS ELITE™ VS. INFINITI]

Stellaris Elite™ with Adaptive Fluidics™ minimises post-occlusion surge and delivers better chamber stability than Infiniti.^{1,4}

[STELLARIS ELITE™ VS. CENTURION]

Stellaris Elite™ with Adaptive Fluidics™ delivers an effective post-occlusion chamber pressure that's three times higher than Centurion with Active Infusion, resulting in reduced post-occlusion surge.²

STELLARIS ELITE™

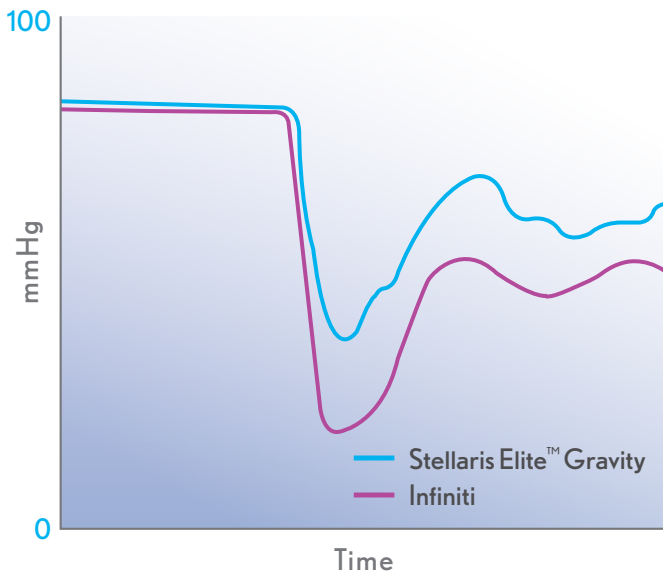

HIGHLY RESPONSIVE AT EVERY MOMENT.

Stellaris Elite™ with Gravity Fluidics

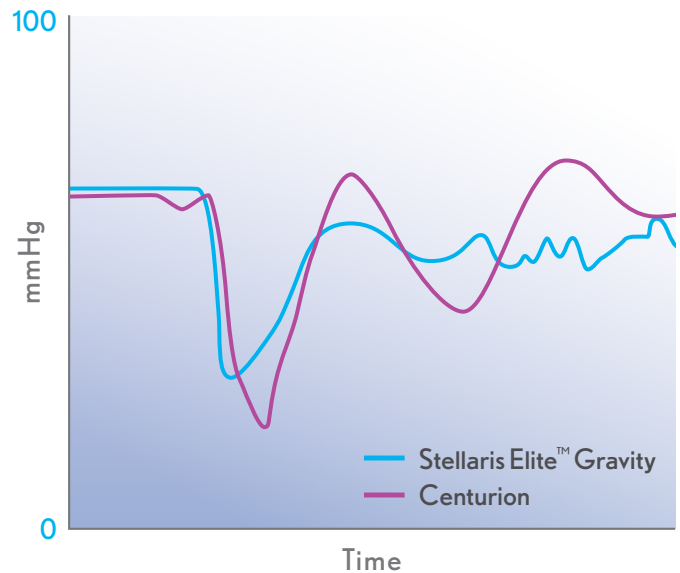

Even with standard gravity fluidics, Stellaris Elite™ outperforms both Infiniti and Centurion systems. Bench tests demonstrate that Stellaris Elite™ with gravity-based fluidics delivers better chamber stability than competitive systems.^{1,2,5}

STELLARIS ELITE™ GRAVITY VS. INFINITI

Stellaris Elite™ with gravity fluidics outperformed Infiniti.¹

STELLARIS ELITE™ GRAVITY VS. CENTURION

Stellaris Elite™ with gravity fluidics delivers chamber stability as good as or better than Centurion with Active Infusion.^{2,5}

Please contact your Bausch + Lomb Surgical Territory Manager to arrange a Stellaris Elite™ demonstration.
